

Solufeed Amigo

Effective natural foliar growth stimulant based on amino and fulvic acids. Soil Association Approved.

Uses

A performance enhancer for a wide range of agricultural crops including salad crops, soft and top and bush fruit, brassicas and root crops. Use either as a routine treatment or applied to assist growth during periods of stress.

Features and Benefits

Contains amino acids of plant origin which are easily assimilated by crops. Eases the requirement for amino acid production within the plant which reduces demands on the plant metabolism. This leads to reduced stress and improved growth.

Plant sugars and soluble nutrients increase chlorophyll production. Added fulvic acids and a natural wetting agent improve effectiveness.

This product is manufactured to the Soil Association Certifications standards under licence number ALXXXX. Approved for use in controlled input organic farms by the Soil Association.

Application timing

Apply after the first true leaves appear when there is sufficient leaf cover to absorb the spray. Repeat at 10 - 14 day intervals for 3 – 5 cycles. Do not apply to crops in flower.

Directions for use

STIR WELL BEFORE USE

Mix with water before application

By knapsack sprayer:

Dilute at the rate of 30ml per 10 litres of water and spray to the point of run-off.

By tractor sprayer:

2 - 3 litres per ha in a minimum of 150 litres of water per hectare.

It is recommended to use prepared stock solutions within two days.

General information

Specific gravity: 1.2

Packaging: 20 litre jerry cans and 1000 litre containers.

Shelf life: 2 years

Technical service: For further information, assistance and access to The Solufeed Advisory Service, please contact Solufeed at the address below.
