

Brassimax

EC Fertilizer

A soluble powder foliar fertiliser developed for *Brassica* species including Broccoli, Brussels Sprouts, Cabbage, Cauliflower, Kohlrabi, Kale, Oilseed rape, Spinach, Tendergreen, Turnip etc.

Uses

A supplementary foliar feed with a combination of nutritional elements including Sulphur (S) that are particularly useful to combat common deficiency diseases in *brassica* crops and which helps to promote a healthy green canopy and also a firm edible heart to the crop.

Benefits

1. Balanced blend of concentrated nutrients developed to meet the needs of the crop.
2. Rapidly and completely soluble concentrated powder formulation suitable for use in tractor sprayers. Minimal packaging waste.
3. Nutrients that are immediately available to the plant, formulated for good uptake and efficient utilisation, as well as crop safety.
4. Manufactured to ISO 9002 – 2000 quality standards using only top quality, high purity raw materials.

Chemical/physical data

Typical analysis:

Analysis		w/w	
Total Nitrogen		7.3%	
Magnesium (Mg) as MgO		6.7%	
Sulphur (S) as SO ₃		18.2%	
Boron	(B)	7.0%	Soluble in water
Copper	(Cu)	2.0	Soluble in water
Manganese	(Mn)	1.6%	Soluble in water
Molybdenum	(Mo)	0.04%	Soluble in water

Analytical Method: Available on request

Appearance: Blended powder

Directions for use

Application rates and directions:

Crops	Rate/ha	Timing
Market <i>brassica</i>	3 – 5 kg per hectare in 200 – 400 litres of water per hectare	Apply in spring as soon as the crop has made sufficient leaf to absorb the spray. Repeat as necessary at 2 week intervals throughout the growing season. For overwintered crops an autumn application is recommended.
Oilseed Rape	3 – 5 kg per hectare in 200 – 400 litres of water per hectare	Apply in autumn once the crop has made sufficient leaf to absorb the spray. Repeat in the spring at the onset of growth.

General information

Packaging: 10 kg

**Harmonised
Tariff No:** 3102-10-90
